

ISO9001:2015 – QMS Scope & Quality Policy

1.0 QMS Scope

Electrified Automation Limited (EA) has adopted the **International Standard ISO 9001:2015** as a basis for its Quality Management System (QMS). **The Quality Manual [QMS-001](#)** details the quality management process used to comply with the standard.

To determine the Scope of the QMS the internal and external issues, for example Customer Specific (CSR) and Regulatory requirements that may impact the QMS, and its strategic direction, have been considered. Furthermore, the Scope has been formulated based on the requirements of interested parties detailed in **Interested parties needs and expectations matrix [QMS-003](#)** and other factors arising from legal, technological, competitive, market, cultural, social and economic environments, whether international national, both regional and local.

The systems requirements of the manual are aimed at achieving customer satisfaction by consistently providing conforming product and meeting customer requirements through application of the system, continual improvement, and the prevention of nonconformity. The scope of Electrified Automation's products and services are:

The Scope of the QMS is:

The design and manufacture of custom automated machinery to support the associated processes required for assembly line solutions of electric motor development for use in robotic manufacturing lines in the UK

The systems and processes at Electrified Automation's are dynamic and shall be improved as required in pursuit of the company objectives.

All business activities are undertaken at the company's premises at:

**Unit 4 Beech Business Park
Bristol Road
Bridgwater
TA6 4FF**

ISO9001:2015 – QMS Scope & Quality Policy

2.0 Quality Policy

Electrified Automation (EA) is committed to satisfy their customer's requirements, in compliance with **ISO9001:2015**.

The scope of the QMS is:

The design and manufacture of custom automated machinery to support the associated processes required for assembly line solutions of electric motor development for use in robotic manufacturing lines in the UK

To minimize any impacts concerning our products and services, Electrified Automation shall:

- Fulfil all compliance obligations; commit to the applicable statutory and regulatory requirements, product and service safety conformity, and risk mitigation.
- Provide a framework to achieve the QMS quality objectives, targets, and programs, in compliance with requirements, and to their customer satisfaction.
- Determine the potential undesired consequences associated with our products and services; as well as the nature, use, and intended lifetime of our products and services.
- Evaluate the performance and effectiveness of our QMS, the need for continual improvements to our QMS, and the performance of external providers.
- Address risks and opportunities by integrating our QMS into our business processes and strategies, while continuously improving our QMS, and enhancing its performance.

This policy is communicated to those performing work under Electrified Automation's control, and is available to all Electrified Automation's stakeholders, interested parties and to the public, upon request
